

Noridc Letters Keyboard

1. HOW TO USE

The Nordic letters keyboard is nothing else than creating new keyboards shortcuts to add the Nordic letters æ, å, ø, Å, Æ, Ø to your keyboard.

The shortcuts for them are:

- æ : Alt Gr + R
- å : Alt Gr + A
- ø : Alt Gr + O

(example on a Swiss keyboard – but the combinations stay the same on every keyboard)

°	+	"	*	ç	%	&	/	()	=	?	`	~	Backspace

Make sure, before using the keyboard shortcuts, to reboot your PC.

ABOUT

NordicLetters uses the tool AutoHotkey (made by Chris), which adds the functionality to create keyboard shortcuts for software's, letters, symbols etc..

By placing the correct keyboard shortcuts into the start-up folder, we made sure that we can use those letters always after we booted our PC.
